

# Call To Arms! Before its too late! Special Group Demands Equal Rights!

In this enlightened era of equal rights, a most important group has been totally ignored, despite their continued pleas for help.

They are being eaten alive, thrown into fires to be burned alive, physically abused and destructively mangled in countless ways. Daily, thousands die of neglect.

Their cries of pain have been totally ignored. Because of a simple language barrier they have been denied a vote in all political processes. It is time to stop this travesty of justice and horrible social condition.

**It's time to recognize plant's rights and begin showing proper dignity and respect for fruits and vegetables.**
