

Talk about confusing...

## Getting A "Piece Of Tail"

- The statement itself has very little in it to even connect in any way with sex other than the obscure geographical reference to the end of the spine.
- Does getting a "piece of tail" mean that when you collect enough pieces you can put them together to form a whole one?
- Does it mean that the person "giving" isn't going to have any left if they do it too many times, or does it grow back?
- Once you get one, what are you going to do with it? Does it need to be refrigerated to keep it from spoiling? Can you cook it, or is it eaten raw?
- How long will it keep before it gets old and stinky?
- If you dry it out in the sun, can you hang it on a bulletin board, tie it to your car's radio antenna or make a hat out of it?
- Does the use of the word "getting" mean someone is giving it away, it is stolen or simply purchased? Whatever happened to the idea of sharing the simple pleasures of life between two consenting adults, where sex is a joint gift of pleasure freely exchanged?
- Perhaps the whole thing is a matter of misspelling and it was really a piece of "tale", referring to the fictitious and imaginative nature of most such stories?
