

Why Is It? that . . .

1... tires only get flat on the bottom?

2... whenever you signal to change lanes, the car behind you interprets your signal as time to move up and close the gap ahead?

3... a glass that's half empty always has less in it than a glass that's half full?

4... cops seem to expect you to like them when they stop you and give you a ticket?

5... When you know just what you want to say, the opportunity is never there, and the opportunity to say it always shows up when the right words are lost?

6... no matter how short it may look, you always get stuck in the longest line in the store?

7... grain is used to fatten cattle, yet we are told to eat lots of grain when we want to lose weight?

8... we always seem to have either the time or the money to do what we want, but never both at the same time?

9... men can always remember endless sports and mechanical statistics, but never an anniversary or birthday?

10... women always complain about men leaving the toilet seat up, when the whole idea was to keep it dry and clean for them?
